

CONNECT DIRECTLY TO THE SOURCE OF ON-DEMAND RELIABLE, RENEWABLE POWER

Snowy Energy's NetZeroMatch offers Commercial & Industrial (C&I) customers a unique and powerful way to meet their sustainability goals. Similar to a tailored Power Purchase Agreement (PPA), NetZeroMatch matches the majority of your business's electricity consumption to the certified hydroelectric generation of a specific Snowy Hydro established hydro asset.

NetZeroMatch is 100% certified renewable sourced energy matched with the mandatory LGCs, with the remaining matched to International Renewable Energy Certificates (I-RECs) sourced from a specific hydro power station from the Snowy Scheme.

RENEWABLE FUTURE – ABOUT SNOWY HYDRO

At Snowy Hydro, we have lived, breathed and delivered renewable energy to Australians through the mighty Snowy Scheme for generations. We are committed to continuing this legacy and leading the charge to a renewable energy future.

LEADERS IN
RENEWABLE
ENERGY

WHAT WE OFFER

100% renewable matched energy

100% energy matched from Snowy Hydro's renewable hydro electric scheme and portfolio of wind, solar energy (via offtake arrangements).

LGCs

Allocation of Large-scale Generation Certificates (LGCs) as per the Large-scale Renewable Energy Target (LRET) - Renewable Power Percentage (RPP).*

I-RECs

The remaining load is matched by International Renewable Energy Certificates (I-RECs) from the Snowy Scheme.**

THE INTERNATIONAL TRACKING STANDARD FOUNDATION

The International Tracking Standard Foundation (I-TRACK Foundation) is a non-profit organisation that provides a robust standard for developing attribute tracking systems. The I-TRACK Foundation is acknowledged by major reporting frameworks such as the Greenhouse Gas Protocol (GHGP) and the CDP as a reliable backbone for credible and auditable tracking instruments. It ensures the highest quality systems and adherence to best practices designed to avoid double counting, double certificate issuance, and double attribute claims.

1:1 MATCHING

100% certified renewably sourced energy product with a 1:1 matching promise of one certificate surrendered per MWh consumption. All consumption is matched by LGCs* under the LRET obligations, and I-RECs match the remainder.

CERTIFIED RENEWABLE ENERGY PRODUCT

I-REC certificates provided under NetZeroMatch are sourced from Snowy Hydro's long-lasting hydro generators, allowing your business to tangibly demonstrate its commitment to specific and long-standing renewable energy sources, such as the iconic Tumut or Murray facilities.

WHAT ARE I-RECS?

I-RECs are international renewable electricity certificates (I-RECs or I-REC(E)s) administered by the I-TRACK Foundation.

I-RECs are recognised by major reporting frameworks (such as GHGP and CDP) and managed by the robust I-TRACK system and Evident registry.

Each I-REC provided through NetZeroMatch represents 1 MWh of hydroelectric generation from the Snowy Scheme.

*Source: cleanenergyregulator.gov.au/RET. Renewable power percentage: 16.67% in 2026.

**I-REC certificates are not recognised under the Renewable Energy Target scheme, the GreenPower accreditation or the National Greenhouse and Energy Reporting (NGER) Scheme for mandatory reporting in Australia. Customers should obtain their own advice on whether NetZeroMatch can meet their individual sustainability or renewable objectives.
